

1900 Student Chair Product Specification

FRAME: Integrated back/seat/leg design provides classic look and maximum strength. Frame is formed of two parallel 1" 18 gauge tubes that are welded together underneath the seat. U-shaped back is carefully contoured to the plastic to ensure maximum screw engagement and strength. CDF uses a process which maintains the tubes under compression for superior strength. Slight extension of rear legs provides a "wall saver" feature.

SEAT and BACK: The frame is contoured to fit the shape of the 5/8" Melsur™* solid seat. Solid plastic is stain/wear resistant and self-extinguishing. The seats and backs are attached with steel rivets underneath the plastic resulting in no exposed hardware on the surface. The 5/8" Melsur™ seat has a waterfall edge to improve seating comfort.

METAL FINISH: Bright nickel chrome plating meets all present requirements for noncorrosive and abrasion resistant finishes.

CASTERS: Double casters provide easy movement of chair over the floor.

HEIGHTS: Fixed 12", 13 ½", 15 ½", 17 ½" or Adjustable 12 ½" – 16 ½".

* World's leading manufacturer of solid plastic desktops and seats.

CDF is presented by Scholar Craft Products, Inc.

Made in the USA.
