Overview :

Heavy duty and static free, high-density polypropylene material with a light grain texture surface on both sides, injection molded into a one-piece shell with waterfall edge. Molded in a Ribless back design for comfort and flexibility. The ergonomically designed opening in the shell back provides added comfort as well as a handle grip. The shell is attached to the frame with steel rivets underneath the seat, which offers no exposed hardware on the surface.

The lower portion of the frame is welded to two (2) 3" X 8-1/2" 12 gauge plates which are MIG welded to the extra heavy duty 12 gauge seat support plate. All steel frame parts are powder coated black finish. Star base is five (5) spoke high strength polymer, with five (5) dual 2" hooded swivel casters. Color - Black. Swivel pneumatic lift mechanism adjusts the seat height from 17.5" to 22.5" on the SC510

Available Options: Seat pads, bell glides
